- Merge onto TN-162 N/Pellissippi Pkwy N via EXIT 376A toward Oak Ridge. (go 5.86 miles)
- Merge onto TN-62 W via the exit on the left toward Oak Ridge. (go 4.85 miles)
- Turn right onto Lafayette Dr. (go 1.53 miles)
- Turn left onto Oak Ridge Turnpike/TN-95.
- Oak Ridge Turnpike is 0.1 miles past Marquette Rd
- If you are on New York Ave and reach Vandalia Rd you've gone a little too far (go 0.32 miles)
- 1201 OAK RIDGE TPKE. Your destination is just past N Rutgers Ave

Course Description

This course is designed for paid workers who perform renovation, repair or painting in pre-1978 housing and child occupied facilities. Examples of these workers include renovation contractors, maintenance workers in multi-family housing, painters and other specialty trades.

Under the EPA rule child-occupied facilities are defined as residential, public

or commercial buildings where children under age six are present on a regular basis. The requirements apply to renovation, repair or painting activities. The rule does not apply to minor maintenance or repair activities where less than six square feet of lead-based paint is disturbed in a room or where less than 20 square feet of lead-based paint is disturbed on the exterior. Window replacement is not considered minor maintenance or repair.

If you're working on homes, schools or day care centers built pre-1978, you now must be EPA Lead-Safe Certified.

WHAT

The Lead-Based Paint Renovation, Repair and Painting (RRP) rule is a federal regulatory program affecting anyone who disturbs painted surfaces where lead may be present.

- Submit an application to certify your firm for five years.
- A one-day class will certify your renovators for five years.
- Learn the required steps to contain the work area, minimize dust and thoroughly clean up every day.

WHO

Any contractor, including renovators, electricians, HVAC specialists, plumbers, painters and maintenance staff, who disrupts more than six square feet of lead paint in pre-1978 homes, schools, day care centers and other places where children spend time.

WHY

1. Avoid risk of government fines and civil liability:

- Without certification and by not following approved practices, you and your company can face tens of thousands of dollars in fines and put yourself and your company at risk of potential lawsuits.

2. Protect your workers, yourself and your customers from a health risk:

- Dust from renovation, repairs and painting can contaminate an entire home and, if inhaled or ingested, can cause irreversible damage to children and adults.

3. Gain competitive advantage:

- Certification makes you stand out from others and positions you as a professional contractor consumers can trust. Using your company's certification in your marketing materials may help attract business.

- Consumers will look for the certification before hiring contractors and may be more accepting of additional costs and time associated with doing the job safely.

Upon certification of your firm, your company will be listed as a Lead-Safe Certified Contractor on the EPA website, giving your firm the potential for new customers.
